Hi James,

Thanks! Using IE should have occurred to me (we usually use Chrome). Works much better, thanks.

Ruth

Yes, there is. There's a function called "Open with Explorer" that will let you open the shared folder in a file browser to grab files and bulk download them.

Look in the "Library" tab in the ribbon for the "Open with Explorer" button (make sure you are using Internet Explorer as your web browser, not Chrome, Firefox, or Safari, otherwise that button will be greyed out):

If you don't manage to get that going, let's work together on it Monday? Is there a good time in the morning that I can call you directly?

Hi James,

Thanks for sending that link along. Is it possible we could download each folder, rather than just accessing and/or saving each file individually? There don't seem to be any options for doing this.

Thanks,

Ruth

Ruth, Robin, and Lawrence, you should now have received an invitation email to our SharePoint site directly from Microsoft.

In that shared SharePoint folder I have placed the three sources that were provided to us by EPA and that they have requested also be shared with you.

In that SharePoint invite email are instructions for signing into the site and accessing the files. Let me know if the instructions are unclear, or do not work as expected.

The three sources are contained in three different folders:

- 1) U.S. Army Corps of Engineers, Army Engineer Research and Development Center, June 8, 2014 Mean High Water Memo, contained in the folder "USACE";
- 2) A report prepared for DMB, Redwood City Saltworks by Michael Josselyn, WRA, Inc. titled "Redwood City Salt Plant Approved Jurisdictional Determination Submission," dated May 30, 2012, and contained in folder "Redwood City Saltworks";
- 3) A report prepared for Citizens to Complete the Refuge by Peter Baye (April 2010), titled "Regulatory Analysis of Clean Water Act Section 404 and Rivers and Harbors Act Section 10 Jurisdiction at Redwood City Salt Ponds, San Mateo County, California," contained in the folder "Citizens to Complete the Refuge".

Source number 2 contains the maps and materials most relevant to your tasks, and although sources 1 and 3 might not be as primary for your work, they do have useful background information.
